

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

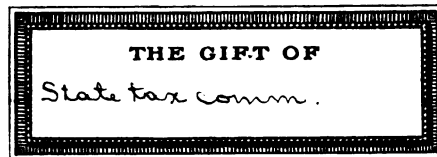

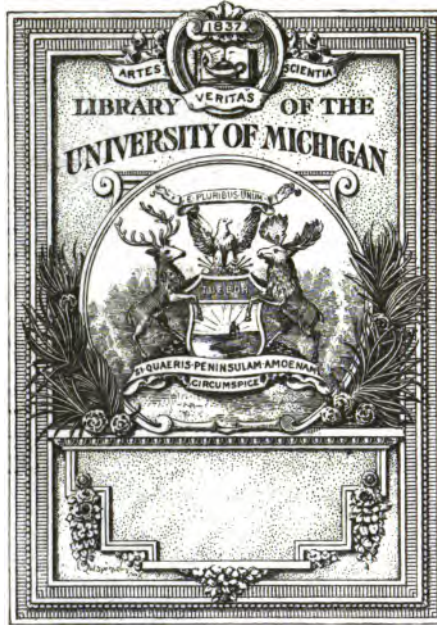

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Fourth Biennial Report
OF THE
STATE TAX COMMISSIONER
OF
West Virginia

FOR THE
YEARS 1911-12

FRED. O. BLUE
STATE TAX COMMISSIONER

CHARLESTON
UNION PUBLISHING COMPANY
1912.

1 Richard 8-24-27 MVP

LETTER OF TRANSMITTAL.

STATE OF WEST VIRGINIA,
OFFICE OF STATE TAX COMMISSIONER,
CHARLESTON, October 1, 1912.

To His Excellency, Wm. E. GLASSCOCK, Governor of West Virginia:

SIR: In compliance with section 5 of chapter 29 of the Code, I herewith submit to you the Fourth Biennial Report of the State Tax Commissioner.

Respectfully,

FRED. O. BLUE,
State Tax Commissioner.

REPORT

The first twenty-two pages of the Third Biennial Report of this office, prepared by my able predecessor, Hon. Thomas C. Townsend, contains very valuable information and suggestions, which, without setting forth *in extenso*, is hereby referred to and adopted as part of this report.

The clerical work of the office is enormous and is growing rapidly year by year. Under the law the office prepares the land books, the personal property books, all the blanks required by the assessors for listing property throughout the state and forms for licenses. In addition to this, all the public utilities assessed by the Board of Public Works make report to the tax office upon blanks furnished them by the office. We begin to send out these blanks during the month of December. They are required to file their reports on or before the first day of April. As soon as these reports are filed it takes the entire time of a number of clerks to compile, tabulate and collate them for presentation to the Board of Public Works when it meets to assess property. As soon as the Board completes its work the office then makes a distribution of the property assessed. This requires time and careful consideration.

For the year 1912, 416 public service corporations reported to the tax office. Of this number 110 were railroads; 121 pipe lines; 139 telephone lines; 22 car lines; 5 express companies, and 19 toll bridge companies. The property of all these companies together was assessed at \$295,029,047.00. To distribute this property to every county, district and municipality to which it belongs is no small task.

LICENSE TAXES.

The legislature of 1909 (Sec. 42a, Chapter 68) passed an act authorizing the state tax commissioner to collect license taxes from persons engaged in a business requiring the payment of a license tax, and, in certain cases, issue license to them.

This law became effective from its passage.

During the license year, up to June 30, 1909, there were issued by the state tax commissioner 796 licenses and collected in license taxes \$10,211.03
For the fiscal year ending June 30, 1910, there were issued 913 licenses and collected in license taxes 33,344.75
For the fiscal year ending June 30, 1911, there were issued 992 licenses and collected in license taxes..... 17,661.88
For the fiscal year ending June 30, 1912, there were issued 873 licenses and collected in license taxes..... 19,986.86
Making a total of licenses issued 3,574 and taxes collected by the state tax commissioner in three and one third years of..... \$81,204.52
The great value of the law respecting the collection of license taxes by the

state tax commissioner is not in the amount collected, but it is in this—that the license revenue laws of the state have become effective and respected. These collections have been made by field agents C. F. Rathbone and P. H. Anderson.

Before the enactment of the law, if one desired to engage in a business requiring the payment of the federal government tax, he generally would pay the government tax;—in other words, there was respect for the federal revenue law—but there was not the same respect for the state revenue law. This has changed. Men today respect the state revenue law, and at the beginning of the license year go to the clerks of the county courts and apply for their licenses, with the result that the state is receiving her revenue from this source in much larger amounts and much more promptly than ever before.

There is a penalty of ten per cent. added to the annual license tax for each month a person engages in a business for which a license is required and for which a license has not been procured, and after one has once paid this penalty, he does not feel like taking chances again.

The following table shows the amount of license taxes, by counties, collected by this office for the period beginning July 1st, 1910, ending June 30th, 1912.

INHERITANCE TAX LAW.

In 1904 the legislature amended the inheritance tax law and made it the duty of the State Tax Commissioner to collect the tax. This law was further amended by the legislatures of 1907 and 1909. These amendments subjected a larger class to its provisions, and, in some instances, to a larger rate than the act of 1887.

Substantially three-fourths of the states of the union have inheritance tax laws; and it is one of the equitable methods in the distribution of wealth. It is only by virtue of law that property passes by descent to certain kindred. The state has the right by law to say where property shall go at the death of the owner; that is to say, whether it shall pass to his devisees, if he make a will; to his children, if he die intestate, or whether it shall go to the state.

It is the policy of our law that the owner may dispose of his property by

will, or if he die intestate that it shall go to certain kindred, but, as already said, this is merely because of a rule prescribed by the legislature. Large estates accrue frequently through the labor and energy of those who are entire strangers to the decedent; to illustrate: If "A" purchases a large tract of virgin forest at a low price, or, a large tract of undeveloped coal at a low price, the work and energy of thousands of men in the state engaged in the development of her resources, building of towns and cities, building public roads by public taxes, and building of railroads necessarily greatly increase the value of the virgin forest or the undeveloped coal, perhaps tenfold, yea even fifty fold; and yet the owner has not contributed his energy or labor to this great increase of the natural wealth. Now it is recognized that they, who, by their labor, energy and resources have added wealth to the natural resources, should, in some way, participate therein; and, therefore, the imposition of our small inheritance tax at the devolution of the property, is nothing more nor less than fair.

Many men of means from other states have come into West Virginia and purchased large areas of timber from our people at a mere nominal price, and the same is true respecting our coal. We have welcomed and welcome now these people and their capital; and while some of them have developed their property, many of them have been investors only, holding the property for rise in value brought about by the agencies hereinbefore mentioned. This office has collected from non-residents inheritance taxes growing out of such conditions; that is to say, a tax from those who came and invested their money in timber but who never developed it—men who bought it at one and two dollars per acre and held it until the investment had increased many fold by the energy and labor of our people in the development of the state.

Our statute exempts ten thousand dollars to each child and the husband, and fifteen thousand dollars to the widow; so until after the amounts exceed the exemptions, after the payment of all debts and the costs of administration, there is no tax; and the rate of tax is very small compared with the rates of some other states. The exemption of ten thousand dollars also applies to father, mother, grandchildren and all other lineal ascending as well as descending descendants. If one die without lineal descendant, whether ascending or descending, leaving his accumulations to those who helped not to earn them and such accumulations have come to him because of the protection of the state, and largely, perhaps, from the contributions of society at large—it is certainly fair that society at large should participate therein, and, therefore, as a rule of law in such cases, the state exercising that right for the benefit of society at large, does participate.

The following condensed statement shows the amount collected by this office since the collection of inheritance taxes has come under its jurisdiction:

For the fiscal year ending September 30, 1905.....	\$ 10,494.86
(A part of the fiscal year only)	
For the fiscal year ending September 30, 1906.....	26,052.10
For the fiscal year ending September 30, 1907.....	95,010.76
For the fiscal year ending September 30, 1908.....	87,966.82
For the fiscal year ending September 30, 1909.....	115,746.50
For the fiscal year ending September 30, 1910.....	91,680.79
For the fiscal year ending September 30, 1911	107,510.69

From October 1, 1911, to September 30, 1912..... 170,224.73

Total\$704,687.25

Some amendments of our inheritance laws are set forth in my recommendations.

The following table shows collections from inheritance, by counties, for the period beginning October 1, 1910, and ending September 30, 1912:

THE TAX BUDGET.

In 1904, the year next preceding the revision of the tax laws by the legislature, the total taxable property of the state was \$278,829,659, made up as follows: Real estate \$168,480,150; personal property \$80,356,209; and public utility property \$30,043,300. In 1911 the total taxable property of the state was \$1,148,006,006, made up as follows: Real estate \$619,156,816; personal property \$238,325,680; public utility property \$290,523,510. The steam and electric railroads in 1904 were assessed at \$30,043,300, and in 1911 at \$192,214,600. In 1912 the total taxable property of the state is \$1,168,012,658, made up as follows: Real estate \$633,747,633; personal property \$239,236,206; public utility property \$295,028,819. The steam and electric railroads in 1904 were assessed at \$30,043,300, and in 1912 at \$194,314,100.

PENALTIES FOR FAILURE TO RETURN PROPERTY FOR TAXATION.

The legislature of 1904 passed an act imposing a penalty for failure to return property for taxation, and made it the duty of the prosecuting attorney of the county to enforce the collection of the penalty; and if he fail to properly enforce the law, the state tax commissioner is authorized to enforce it.

These penalties are apportioned to the various funds in the district and county in which the property should have been returned for taxation according to the current year rate of levy, the state getting only such proportional part of it as the state levy bears to the total levy for all purposes.

The following table shows penalties collected through State Tax Department for the biennial period beginning October 1, 1910 and ending September 30, 1912.

STATISTICAL TABLES.

As an appendix to this report there is attached a number of statistical tables. The preparation of these tables involves a great deal of labor. They are prepared with the greatest care, and are believed to be correct. Similar tables to these, but not so extensive have been prepared by the Tax Department since 1904. The information disclosed by these tables can be ascertained in any county since 1904, by reference to the biennial reports of the State Tax Commissioner. Prior to that time this information is not available.

The Tax Commissioner's office has given considerable attention to the compilation and preservation of statistics. One of the most difficult branches of the work of the office has been to obtain reliable statistical data relative to the tax laws. The results of the tax system can only be obtained through statistical data. These tables furnish to the public information to which they did not have access prior to the creation of the Tax Department, and with each succeeding biennial report of the Tax Commissioner the tables have been more extensive and elaborate. An examination of each table will furnish its explanation.

UNIFORM PUBLIC ACCOUNTING, EXAMINATION OF PUBLIC OFFICES AND COUNTY SALARY LAW.

These subjects are referred to at length in my report as Chief Inspector and Supervisor of Public Offices, including comprehensive tables therewith.

RECOMMENDATIONS.

I make the following recommendations:

First. A license tax on the production of crude oil and natural gas. We are producing approximately two hundred and twenty-five billion (225,000,000,000) cubic feet of natural gas, and approximately ten million (10,000,000) barrels of crude oil annually. These natural resources, once depleted, cannot be restored. Approximately seventy per cent. of the natural gas produced is marketed and consumed outside of the state; and a larger part of the oil produced is carried to refineries outside of the state. A very small license tax on crude oil and natural gas (based on present production) will yield a revenue to the state of approximately one million, five hundred thousand (\$1,500,000) dollars annually.

Second. Legislation so that the state may control the natural water power of her streams within her borders. This great natural resource is scarcely ap-

preciated, yet the streams belonging to the state and over which she may exercise control, are valuable and the day is not far distant when they will be seized by private interests, unless legislation be enacted saving them to the state. Such streams will furnish power sufficient to drive the machinery in our mills and factories, and light and heat our homes and cities. If this great natural resource is saved and conserved to the state, she will be able to derive from it, by sale or lease, large revenue; already much of such natural power has been acquired by private interests and is now vested in them.

Third. That the law be amended so that the fiscal year for state purposes shall end June thirtieth instead of September thirtieth, the end of the present fiscal year. The fiscal year for county, school and municipal purposes ends June thirtieth under the present law, hence the fiscal year in West Virginia would be uniform.

If the state fiscal year ended June thirtieth sufficient time would be given to the several state officers and departments in which to prepare with much more accuracy and in much better form and have printed, the biennial reports, so that said reports could be in the hands of the legislature before convening.

If the state fiscal year ended June thirtieth the appropriation by the legislature would be made before the beginning of the new fiscal year, and not after one-half of the year has passed, and not after the money has been expended. A much simpler system of accounting could be established if the appropriations were made and fixed before the money is expended.

Fourth. That section 6, chapter 63, acts of the legislature of 1909, be amended by striking out the word "within" and inserting the word "without" in the sixth line from the bottom of the last paragraph. The word "within" is in the statute by inadvertence and kills the intended effect thereof. Stock in West Virginia corporations owned by non-residents of this state, is seldom, if ever, found within it.

Fifth. That section 9, chapter 6, acts of the legislature of 1904, be amended so as to require payment of interest on inheritance taxes after they become payable, at the rate of ten per cent. per annum.

Sixth. That section 14, chapter 6, acts of the legislature of 1904, be amended by striking out that provision of said section requiring a certificate to be executed by the state tax commissioner where no inheritance taxes are payable. This certificate, where no inheritance taxes are payable, can serve no purpose as a protection to the estate for no lien exists, and because, if it afterward develops that an inheritance tax is due the state, although release has been executed and recorded, the tax can be assessed and collected.

Seventh. That section 16, chapter 6, acts of the legislature of 1904, should be amended requiring the assessment of inheritance taxes when made by the state tax commissioner, to be sent directly to the clerk of the county court and recorded in the trust deed book so as to give notice that a lien exists against the estate liable to the payment of an inheritance tax until the tax has been paid.

Eighth. That chapter 90, acts of the legislature of 1909, amending the law relative to the laying of school levies, should be amended fixing clearly the limitation of school levies for all purposes. As the law now exists, levies may be laid under certain conditions without statutory limitation. The limitations for all purposes should be clearly and specifically set out. It has been necessary to go into the courts to get an interpretation of this statute as it now exists and yet it is not plain just what limitations do exist under certain conditions, other than the ones where no limitations are provided for.

Ninth. That legislation be enacted directing the auditor to certify to the clerks of the county courts the payments of the distributable school fund, so that proper charges may be made against the sheriffs in the county clerks' offices when payments are made to them. Many irregularities have been found because proper charges were not made against the sheriffs in the county clerks' offices when this fund was distributed.

Tenth. That legislation be enacted authorizing the auditor to make annual distribution of the funds arising from the redemption of delinquent lands. As it is now, these funds are retained in the auditor's office for long periods of time and no distribution made of the same until application is made by the county court. This distribution should be made to the various counties entitled to the same not later than the 15th day of June, each year, in order that the same may be in the hands of the sheriff at the time his annual settlement is made in July, and in order that the county court may take into consideration the same when laying levies.

Eleventh. That section 8, chapter 30, Code, be amended fixing a penalty of ten per centum to be added to all taxes not paid before the first day of January, such penalty to be a fixed percentage, and not an interest penalty; and such penalty to be a part of the public taxes and paid into the public treasury.

Twelfth. Legislation to require sheriffs or collectors of public taxes to make settlement between the fifteenth and thirty-first day of December, for the last year of the retiring sheriff's regular term of office, so that at the expiration of his four-year term, as sheriff or collector, a complete settlement can be had and taxes remaining unpaid certified for collection by the county court, or other fiscal body in lieu thereof, to the sheriff whose term begins on the first day of January succeeding.

Thirteenth. That section 31, of chapter 36, acts of the legislature of 1905, be amended so that the holding of a federal government license to sell at retail or wholesale, intoxicating liquors, shall be *prima facie* evidence of a sale at wholesale or retail, as the case may be, in violation of the state revenue laws, by the licensee named in the government license, without a state license therefor; and that the burden shall be upon the licensee to show that no such sale was made during the period for which the government license runs.

Fourteenth. That section 43, of chapter 82, acts of the legislature of 1907, be amended so as to require the posting in the place of business of the licensee of all licenses mentioned in paragraphs (e), (f), (g), (h), (l), (n), (o), (p),

(y) and (z), in section 2, of said chapter; and that the holder of any other license mentioned in said section 2, be required to carry the same with him so as to be able to produce the license when requested by any public officer legally authorized to demand a production of the same. A penalty should be provided for failure to post or carry any license mentioned herein.

Fifteenth. That section 105, chapter 36, acts of the legislature of 1909, be amended so as to make a license to operate a merry-go-round, ferris wheel or like device, co-extensive with the state and that the license tax to operate the same be fixed as follows: For one year, one hundred and fifty dollars; for six months, seventy-five dollars; for three months, fifty dollars, and for one week, ten dollars; that section 114 of the same act, be amended so as to make a hawker or peddler's license co-extensive with the state and the annual tax be fixed as it now is; and that section 115 of chapter 82, acts of the legislature of 1907, relative to granting a license to sell sewing machines, be amended so as to make the license co-extensive with the state and that an annual tax of twenty-five dollars be charged each sewing machine agent to transact business in this state; and providing further that where such agent is employed by any sewing machine agency, doing business in the state, an attested copy of the license issued to such agent shall be posted at the place where the agency carries on its business; and unless such copy is so posted, that such agency shall be subject to payment of the license tax for such agent. And that when either of the above licenses is granted in one county, if the holder thereof desires to transact business in another, he be required to present the same to the clerk of the county court of the county in which he desires to transact business, and procure his endorsement on said license and that a fee of fifty cents be charged for said endorsement.

Sixteenth. Legislation making the county superintendent of free schools *ex-officio* financial secretary of the several boards of education in his county and making it the duty of the financial secretary to keep all financial records of the schools within his county; requiring all orders issued by the boards of education to be countersigned by the county financial secretary before they are payable by the sheriff or school treasurer. The law should also require the annual settlement with the sheriff or school treasurer to be approved by the financial secretary before the same is presented to the county court for its approval.

Under the present law the county superintendent makes a financial report of the several boards of education to the state superintendent of free schools, which is compiled from reports made to him. With the law amended as recommended the county superintendent would be able to keep an accurate record of all expenditures for school purposes and to compile a school report for the county from his own records.

Seventeenth. That the provisions of law relating to creating and handling sinking funds, when public bonds are issued, be made more stringent and mandatory. In this connection attention is directed to the large bonded indebtedness of counties, districts and municipalities and the small amount of sinking fund now provided as the same appears in my report as chief inspector.

Eighteenth. That the legislature take necessary steps to provide for the election of a county treasurer, in each county, at the general election in 1916, who shall collect and disburse all public money in his county. The sheriff, after January 1, 1917, to be the high peace officer and court officer of his county.

Nineteenth. That the necessary steps be taken to increase the compensation of the commissioners of the county courts. The commissioners perform most important public duties and at merely nominal compensation. This will require an amendment to the constitution.

I am much indebted to the faithful and efficient assistants and employees in the work of the State Tax Commissioner's Office, and to them is very largely due the credit for any success of the work. ¶

Respectfully submitted,

FRED. O. BLUE,
State Tax Commissioner.

BARBOUR COUNTY.

APPENDIX B

APPENDIX B

A TABLE SHOWING THE ASSESSED VALUE BY COMPANIES AND COUNTIES OF THE PROPERTY OF RAILROAD, OIL AND GAS, WATER AND LIGHT, TELEPHONE AND TELEGRAPH, EXPRESS, CAR LINE AND TOLL BRIDGE COMPANIES, FOR THE YEARS 1904, 1911 AND 1912.

ASSESSMENTS MADE BY THE BOARD OF PUBLIC WORKS, EXCEPT AS OTHERWISE STATED FOR THE YEAR 1904.

Note 1.—The classification "Oil and Gas Companies" includes such companies as those making their principal business that of transporting oil or gas, or both, whether the oil or gas transported be owned by them or not; in other words, those companies that carry on their business by means of pipe lines. Companies that produce oil or gas and do not own or operate pipe lines are not included in this classification; these companies were assessed by the local assessor in 1907 at \$19,844,208.

Note 2.—The classification "Telephone and Telegraph Companies" includes companies except those not operated in connection with water or gas companies.

Note 3.—The classification "Telephone and Telegraph Companies" includes all telephone and telegraph companies operating in this state except farmers' mutual telephone lines not operated for compensation.

Note 4.—Figures appearing in the following table under the year 1904 include the assessment of steam and street railroads (including all bridges owned by railroad companies operating in this state, and used in the operation of their railroads, whether toll bridges or not), the Pullman Company and the Ohio River Bridge and Ferry Company, as made by the Board of Public Works for the year 1904; and the assessment of oil and gas, water and light, telephone and telegraph, express and toll bridge companies as made by the local assessors of the several counties for the year 1905. Figures showing the assessment of the properties assessed by the assessors for the year 1904 were not obtainable for the reason that the Auditor, acting under the authority of the Legislature, has destroyed the personal property books for that year.

Note 5.—Figures appearing in the following table under the years 1911 and 1912 are those fixed by the Board of Public Works.

Note 6.—The total assessed value of each of the several classes of property in each county may be found in another table of this report.

*Assessed by the local assessors.

A TABLE SHOWING THE ASSESSED VALUE BY MAGISTERIAL DISTRICTS AND MUNICIPALITIES OF THE PROPERTY OF RAILROAD, OIL AND GAS, WATER AND LIGHT, TELEPHONE AND TELEGRAPH, EXPRESS, CAR LINE AND TOLL BRIDGE COMPANIES FOR THE YEARS 1912 AND 1912.

ASSESSMENTS MADE BY THE BOARD OF PUBLIC WORKS.

Note.—Under the law, in the assessment of public utility property, it is the duty of the Board of Public Works to arrive at and fix the value of the property of each company in each county; the apportionment of the assessed value in each county to the several districts and municipalities being the duty of the county court. While the Board of Public Works, where possible, for the information of the county courts, figured out the portion of the total of the assessed value of the property of each company in each county due each of the several districts and municipalities therein, the actual distribution of the assessed value to the districts and municipalities as shown in the following table was made by the several county courts.

BARBOUR COUNTY.

A Statement Showing the Assessed Value, by Districts and Municipalities, of the Property of Railroad, Oil and Gas, Water and Light, Telephone and Telegraph, Express, Car Line and Toll Bridge Companies for the Years 1911 and 1912, as Assessed by the Board of Public Works.

A TABLE SHOWING THE ASSESSED VALUE, BY COUNTIES, OF THE PROPERTY OF
RAILROAD, OIL AND GAS, WATER AND LIGHT, TELEPHONE AND TEL-
EGRAPH, EXPRESS, CAR LINE AND TOLL BRIDGE COMPANIES
FOR THE YEARS 1904, 1911 AND 1912.

ASSESSMENTS MADE BY THE BOARD OF PUBLIC WORKS, EXCEPT AS OTHERWISE
STATED FOR THE YEAR 1904.

Note 1.—The classification "Oil and Gas Companies" includes such companies as those making their principal business that of transporting oil or gas, or both, whether the oil or gas transported be owned by them or not; in other words, those companies that carry on their business by means of pipe lines. Companies that produce oil or gas and do not own or operate pipe lines are not included in this classification.

Note 2.—The classification "Water and Light Companies" includes all lighting companies except those not operated in connection with water or gas companies.

Note 3.—The classification "Telephone and Telegraph Companies" includes all telephone and telegraph companies operating in this state except farmers' mutual telephone lines not operated for compensation.

Note 4.—Figures appearing in the following table under the year 1904 include the assessment of steam and street railroads (including all bridges owned by railroad companies operating in this state, and used in the operation of their railroads, whether toll bridges or not), the Pullman Company and the Ohio River Bridge and Ferry Company, as made by the Board of Public Works for the year 1904; and the assessment of oil and gas, water and light, telephone and telegraph, express and toll bridge companies as made by the local assessors of the several counties for the year 1905. Figures showing the assessment of the properties assessed by the assessors for the year 1904 were not obtainable for the reason that the Auditor, acting under the authority of the Legislature, has destroyed the personal property books for that year.

Note 5.—Figures appearing in the following table under the years 1911 and 1912 are those fixed by the Board of Public Works.
